ROSS GARDAM

Flexible, inviting and productive, the Adapt collection of lounges and accessories are designed to evolve with the dynamic needs of today’s workspace.

The clean lines and subtle surfaces of the Adapt bring a softness and sense of the familiar into the workspace. Offering a diverse range of possible compositions ensures a cohesive design language can be created in any fitout. Adapt is made in Melbourne and was designed by Ross Gardam to perfectly service multiple sectors and applications.

With the ever changing demands of workspaces, Adapt is designed to transform with the individual needs of the space.

Adapt’s modular nature allows components to be easily reconfigured, creating solutions now and for the future.

Based around five core elements with an economical base unit measuring 680 × 680mm (26.8” x 26.8”), each can sit alone or combine to create larger spaces in straight or curved configurations. The elements can be added to by simply attaching arms, backs, mid-height or full-height screens, desks and tables, creating near limitless possibilities.

A truly modular system with functionality at its core, Adapt caters for offices, receptions, universities, airports and hospitality spaces. Conceived for both small and large open-plan spaces, the collection can transform from small booths for study to large team training areas and anything in-between.

DESIGN FEATURES 01

The design intent was to ‘create a functional commercial product with residential junctions’. The breadth of functionality is a response to the demanding and complex environments of use. Adapt is compact but provides a high level of comfort with its well defined internal proportions.

SOFTNESS

A 50mm radius is used throughout to soften the overall appearance and to make the collection approachable and inviting. An overstated French seam features heavily to bring a relaxed nature to the overall design.

PRIVACY

With the addition of a mid-height screen the Adapt transforms into a more private space, a haven in busy environments. The option of a full-height screen creates total visual privacy and can provide a refuge for study and concentration.

CONNECTION

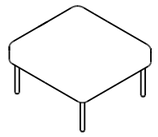
Each screen features nodes enabling a simple installation process while creating a defined visual language that continues through to the lounge, table and desk legs.

TENSION

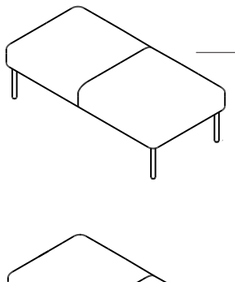
A visual tension between cushions, a soft radius and a seam detail are all designed to create a distinctly residential design language paired with a high level of comfort.

ADAPTABILITY 02

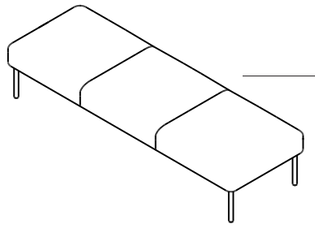
Adapt consists of five core elements as shown below. Each can sit alone or combine in a modular configuration. Arms, backs, screens, desks and tables can be added or removed simply and easily on-site. The versatility this enables is illustrated to the right using one of the five core elements and additions.



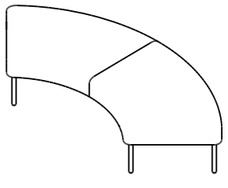
SINGLE SEATER



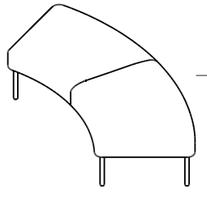
TWO SEATER



THREE SEATER



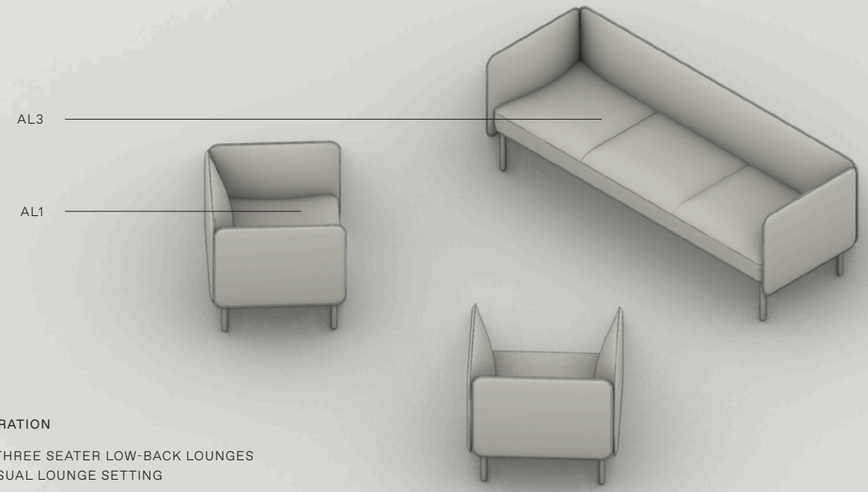
90°



60°

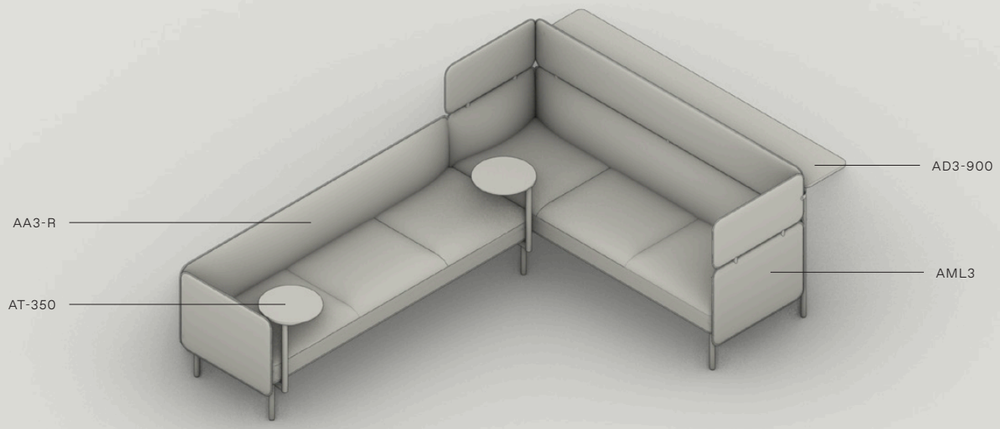
With the addition of two types of curved elements, a 60° and 90° module, distinct break-out, meeting and training spaces can be created in a variety of configurations.

EXAMPLE CONFIGURATIONS 03



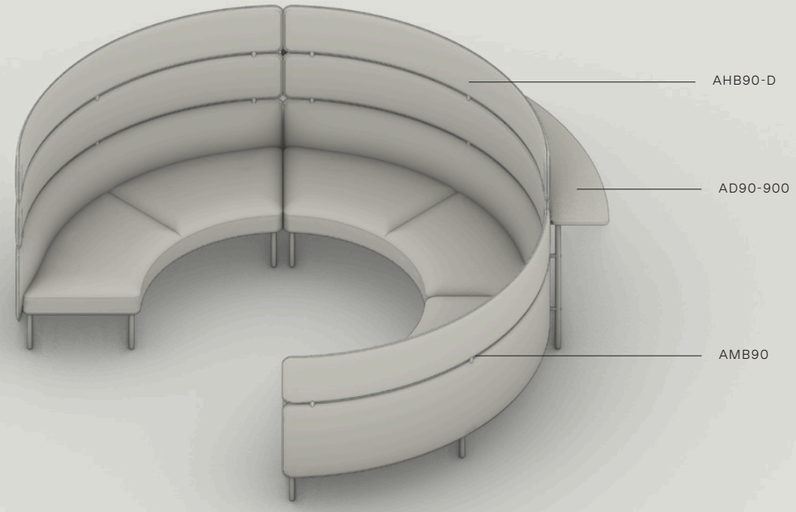
01 / CONFIGURATION

SINGLE AND THREE SEATER LOW-BACK LOUNGES CREATE A CASUAL LOUNGE SETTING



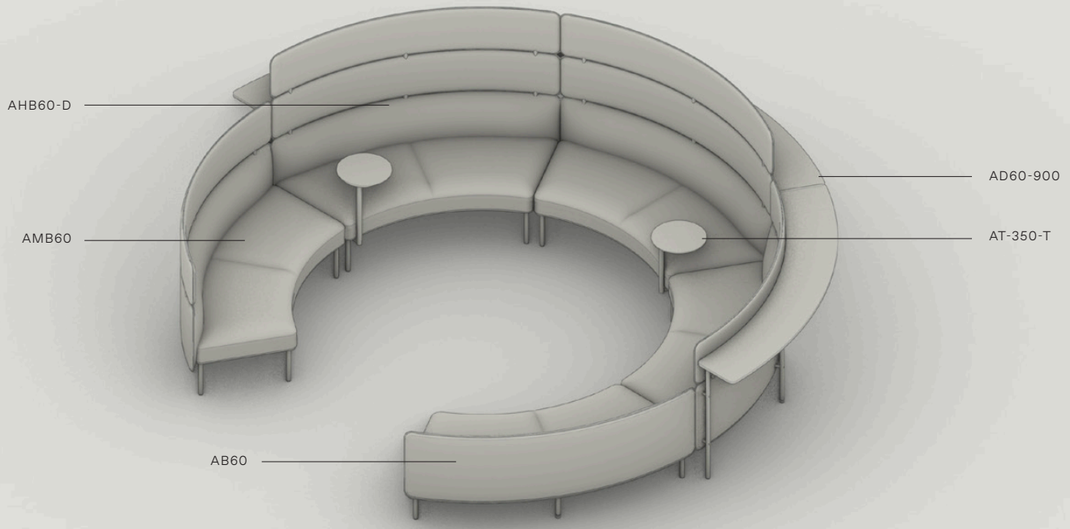
02 / CONFIGURATION

LOUNGES CAN BE JOINED TOGETHER TO CREATE LARGER CONFIGURATIONS OF VARYING HEIGHTS



03 / CONFIGURATION

JOINING 90 DEGREE LOUNGES CAN CREATE CLOSE MEETING SPACES WITH REAR DESKS PROVIDING ADDITIONAL WORKING SPACES

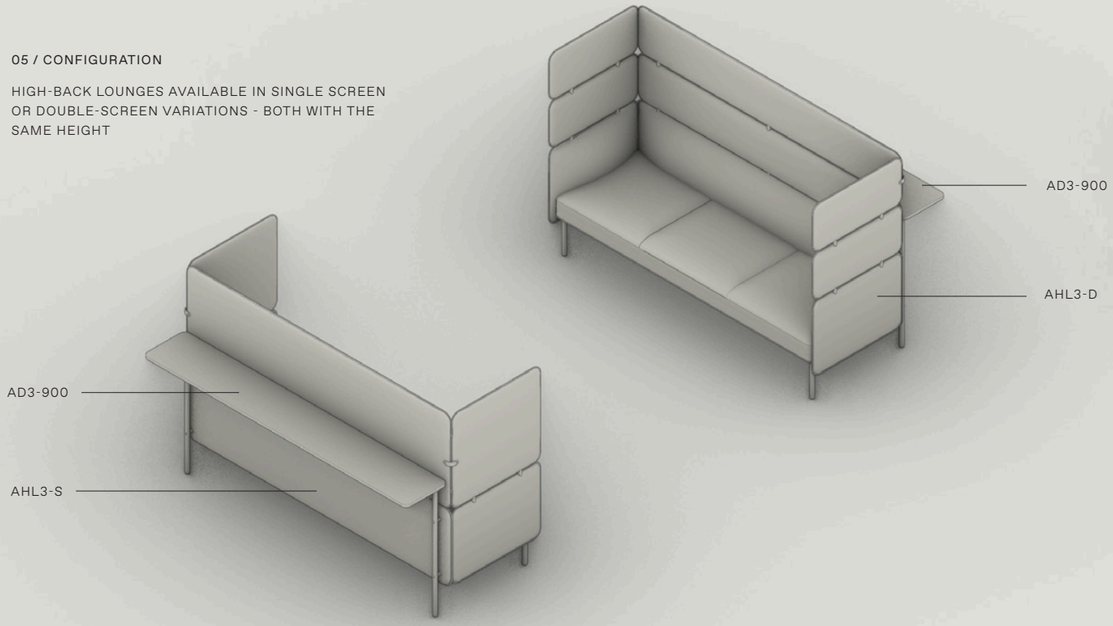


04 / CONFIGURATION

LARGER 60 DEGREE LOUNGES PROVIDE MORE SPACIOUS MEETING SPACES OR PLACES FOR WORKING WITH PIVOTING TABLES ENABLING MOVABLE WORK SURFACES

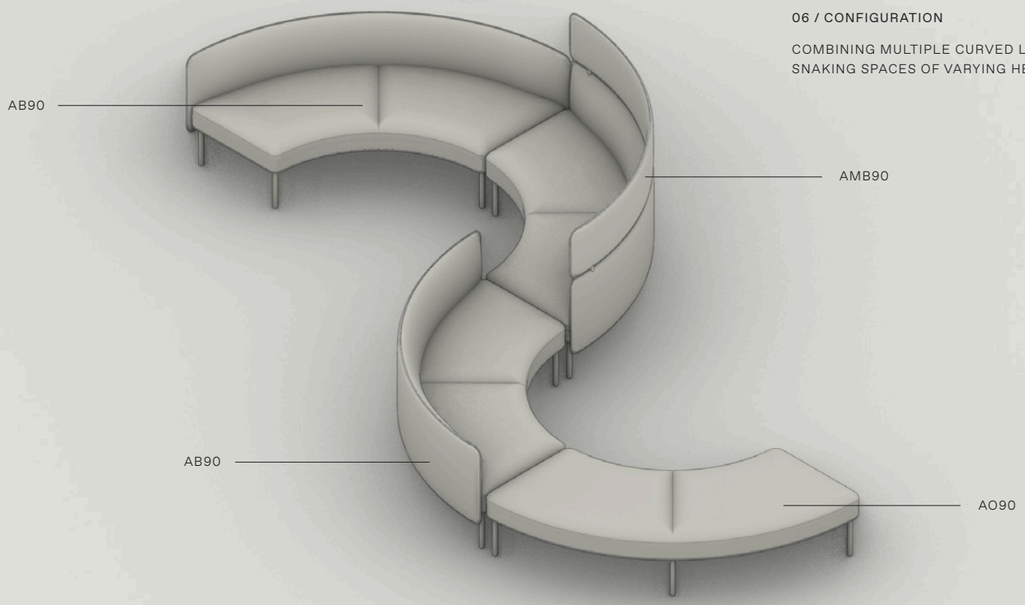
05 / CONFIGURATION

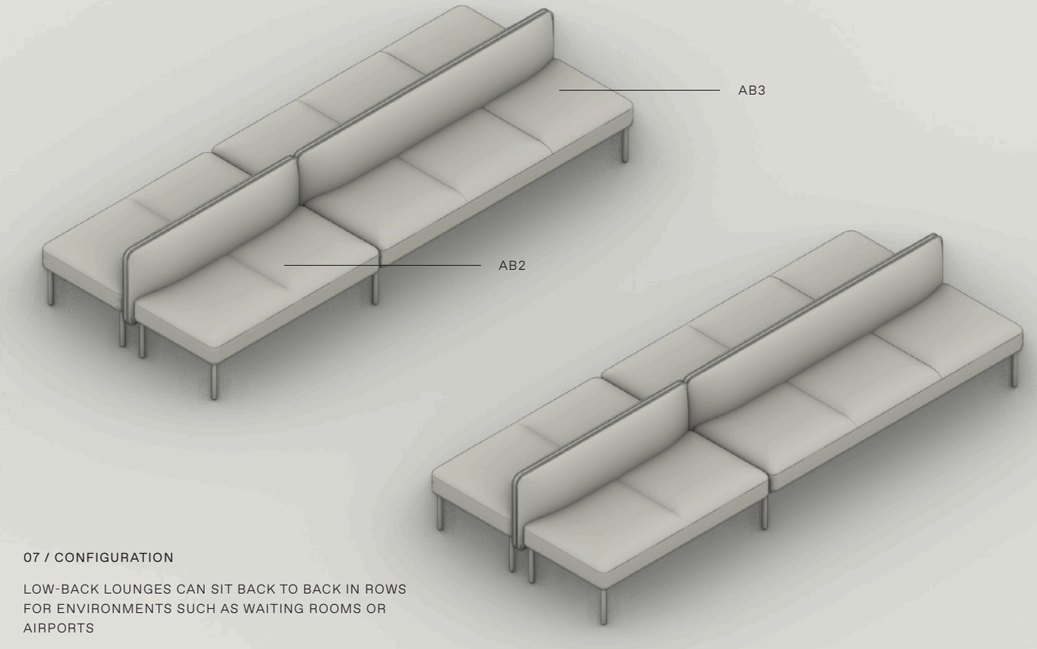
HIGH-BACK LOUNGES AVAILABLE IN SINGLE SCREEN OR DOUBLE-SCREEN VARIATIONS - BOTH WITH THE SAME HEIGHT



06 / CONFIGURATION

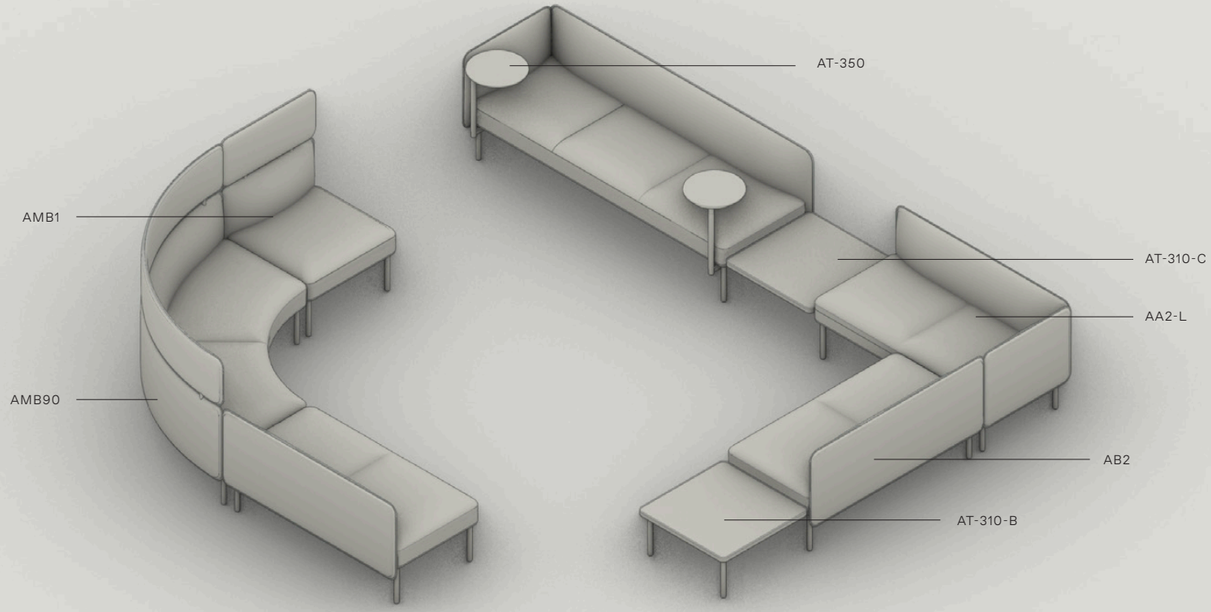
COMBINING MULTIPLE CURVED LOUNGES CREATES SNAKING SPACES OF VARYING HEIGHTS





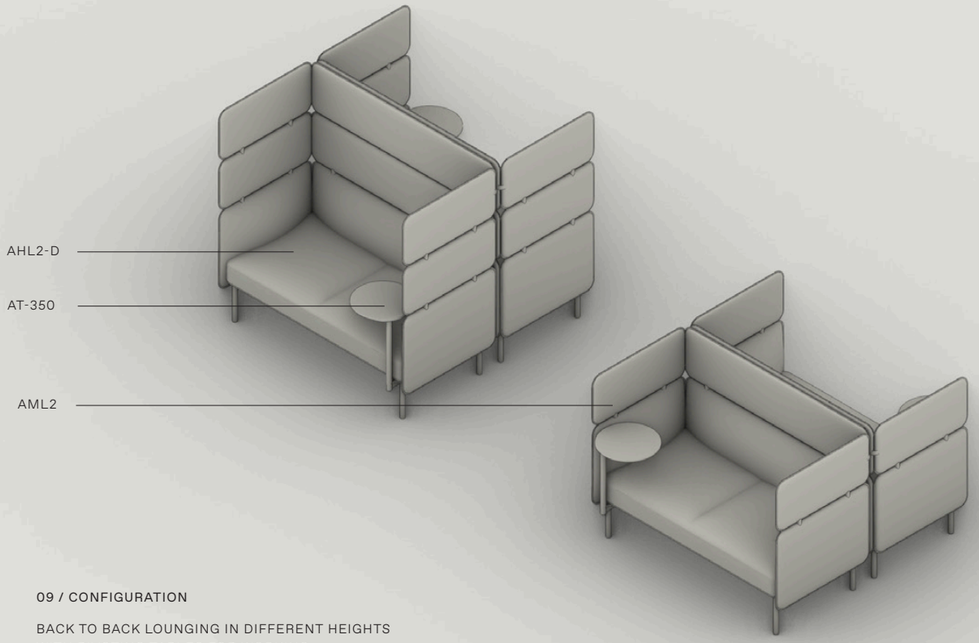
07 / CONFIGURATION

LOW-BACK LOUNGES CAN SIT BACK TO BACK IN ROWS FOR ENVIRONMENTS SUCH AS WAITING ROOMS OR AIRPORTS



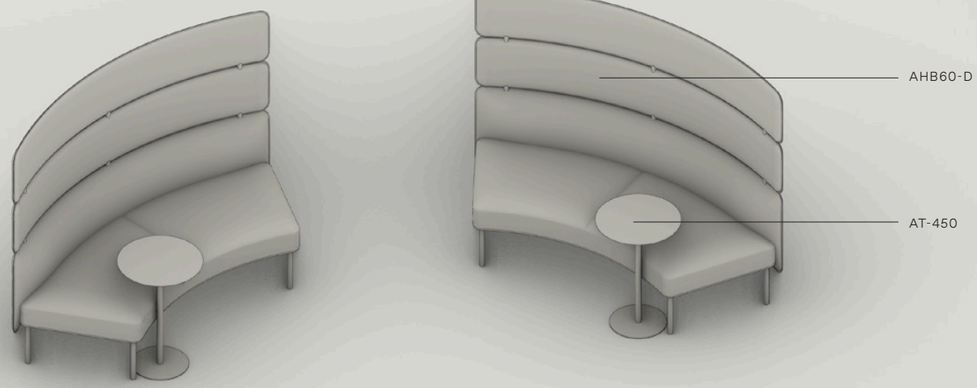
08 / CONFIGURATION

OPEN PLAN SEATING USING STRAIGHT AND CURVED UNITS WITH SIDE TABLES USED TO BREAK UP THE SPACES



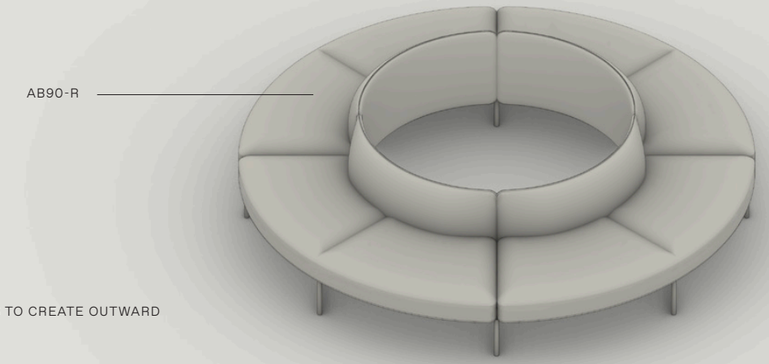
09 / CONFIGURATION

BACK TO BACK LOUNGING IN DIFFERENT HEIGHTS
WITH PIVOTING TABLES FOR WORKING



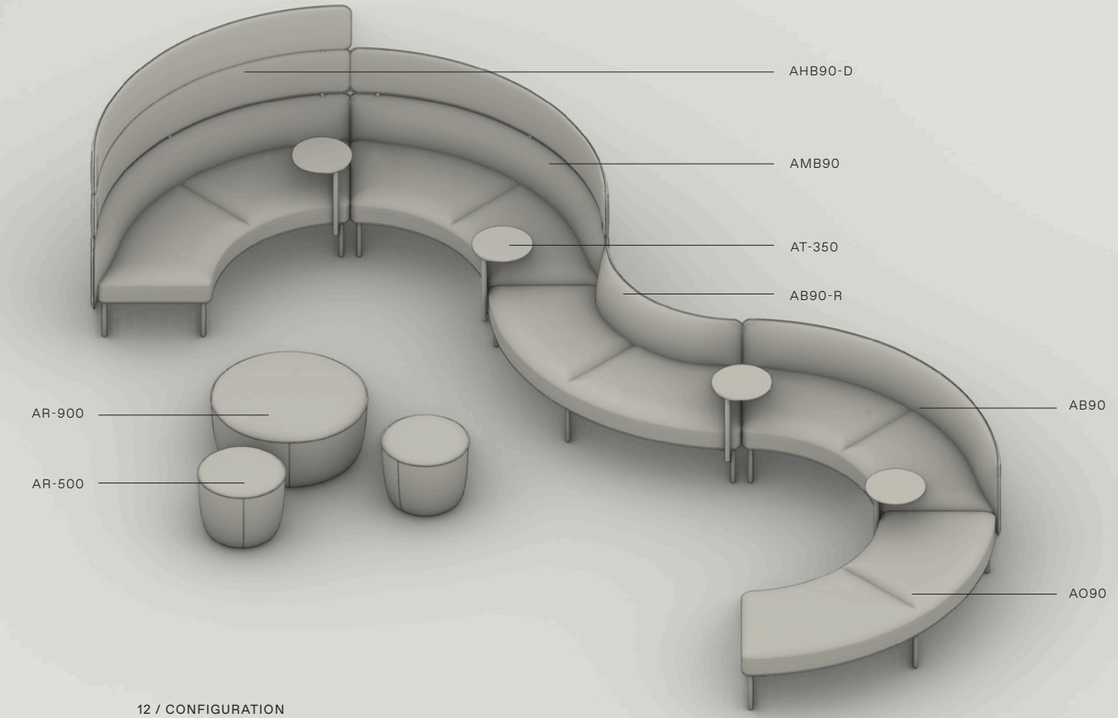
10 / CONFIGURATION

CURVED LOUNGES THAT CAN BE JOINED FOR
INTIMATE MEETINGS OR SEPARATED FOR MORE
PRIVATE WORK SPACES



11 / CONFIGURATION

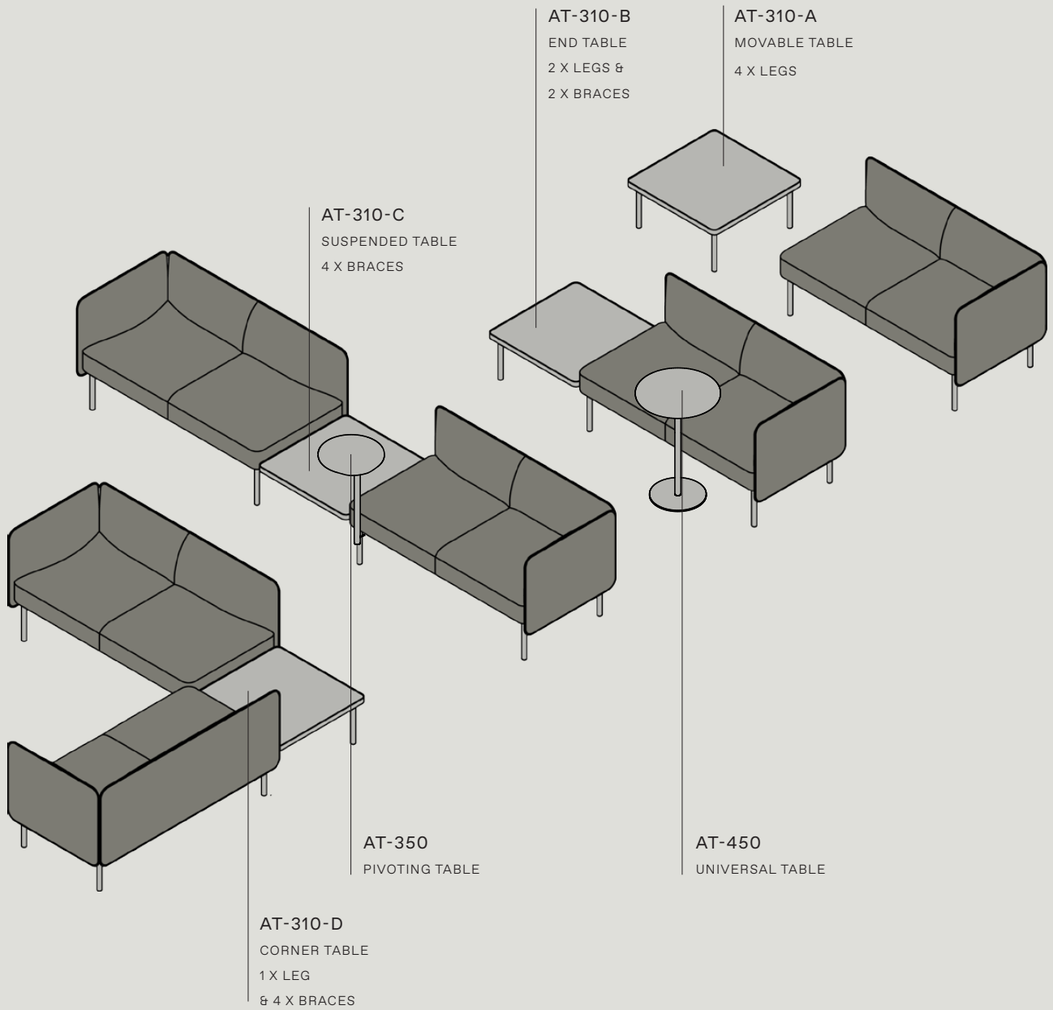
USING REVERSE CURVED UNITS TO CREATE OUTWARD
ISLAND SEATING



12 / CONFIGURATION

COMBINING CURVED AND REVERSE CURVED UNITS
TO ENABLE SEATING ON ONE CONTINUOUS SIDE

TABLES 04

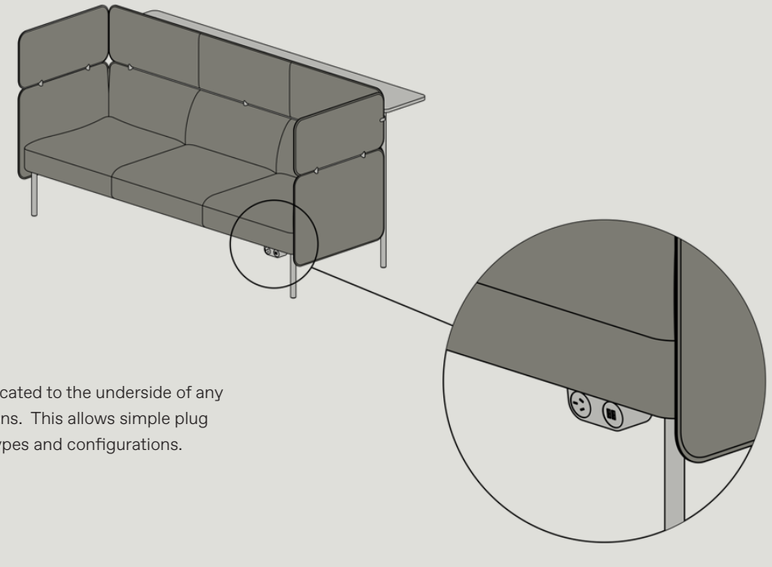


The **Adapt Side Table** is designed for use in various configurations. Refer to above arrangements for available table locations and required leg and brace quantities for each table type.

The **Adapt Pivoting Table** attaches to the lounge underside and pivots horizontally to position as desired while the **Universal Table** is a mobile working surface that can be moved and used in all seating locations.

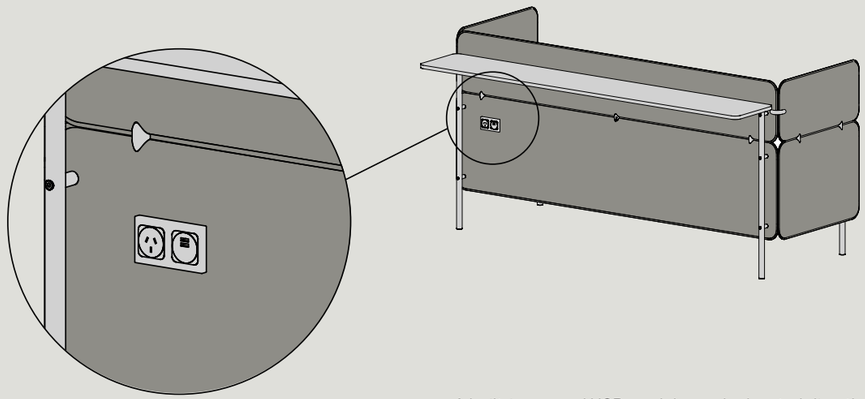
POWER 05

UNDER LOUNGE



A power / USB module can be located to the underside of any of the lounge or ottoman options. This allows simple plug and play with any lounge types and configurations.

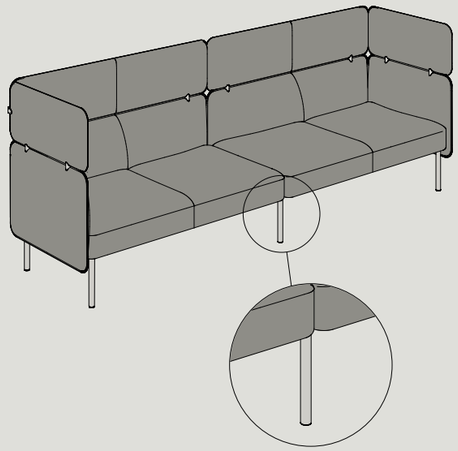
BACK OF LOUNGE



A built-in power / USB module can be located directly into the rear of any back. This offers an ideal location to power up while using the rear desks of the Adapt collection.

DETAILS 06

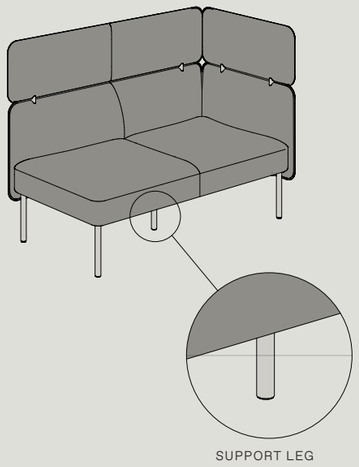
JOINING LEG



JOINING LEG

The **Joining Leg** can be used to join multiple modules together in a banquet-style seating arrangement while reducing the amount of legs required in a setting. Used in place where both front and rear legs are to be joined. Note: lounges become permanently connected.

SUPPORT LEG

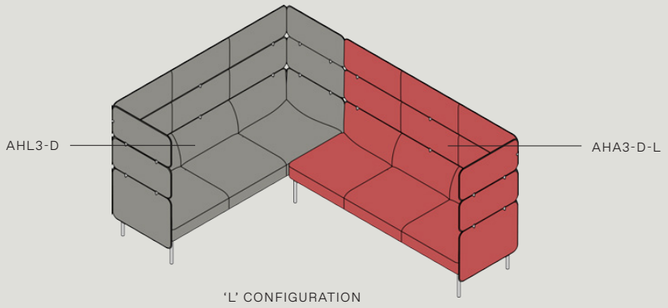


SUPPORT LEG

The **Support Leg** can be added to the centre underside of all 2 and 3 seater lounges, as well as 60° and 90° modules for additional structural strength where required.

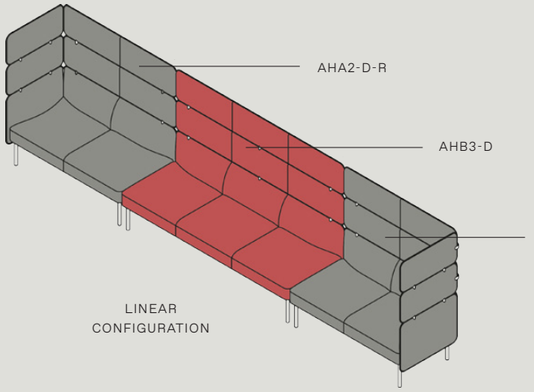
STABILITY REQUIREMENTS

(HIGH-BACK LOUNGE ONLY)

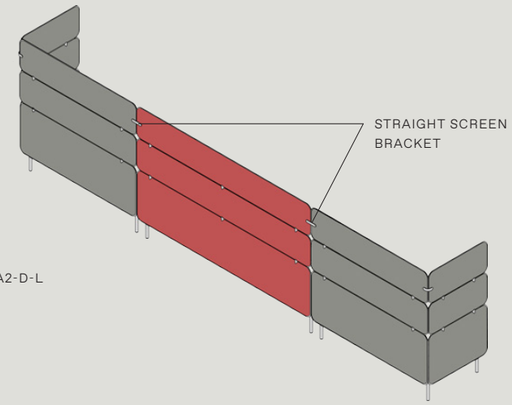


'L' CONFIGURATION

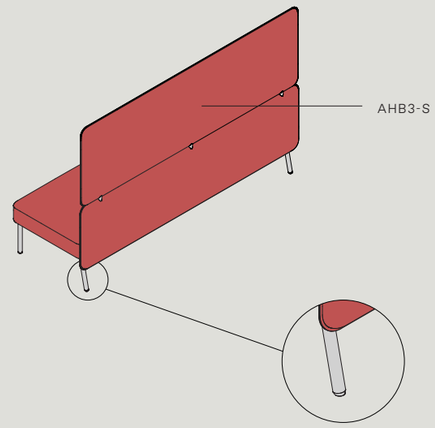
Back-Only and *Single-Arm* High-Back straight modules should be supported from both ends with under lounge joiners and straight screen brackets. This can be achieved through joining to other modules with arms in an 'L' or linear configuration*.



LINEAR CONFIGURATION



If High-Back straight modules are not supported from both ends, they will require angled **Stability Legs** (please get in contact for details).



STABILITY LEG

*Note applies to Back-Only and Single-Arm High-Back straight modules only. Please see Specifications on following pages for applicable lounges.

MATERIALS & POWER

LOUNGE

INTERNAL FRAME / The internal frame is constructed from kiln-dried hardwood and plywood. The seat utilises metal springs for support, creating a high level of comfort and ensuring long-term endurance.

BACK & ARM / The back and arms are constructed from plywood (lounge) or tubular steel and plywood (mid-back lounge/high-back lounge/curved modules). Each back and arm has a unique attachment bracket located under the lounge making the changing of components as simple as removing four bolts.

SEAT CUSHION AND UPHOLSTERY / Formed from shaped polyurethane foam of different densities and polyethylene terephthalate (PET) to create a supportive yet comfortable seat. Upholstery and leathers are available in a range of varying textures, durability and tactility properties. Upholstery is selected at the time of ordering.

LEGS, NODES AND DETAILS / Made from tubular powder coated steel, steel plate and plastic feet for leg inserts.

DESK

DESK TOP / Available in 18mm laminate with custom materials available upon request (see Finishes above). Each rear mounted desk requires two or three rear legs to support the desk top and a central support bracket which sits under the centre of the desk (on three seater straight modules). The smaller rear legs of the lounge are then removed as the entire lounge is supported by the desk legs.

DESK LEGS AND BRACKET / Constructed from tubular powder coated steel, powder coated steel plate and plastic feet for leg inserts.

SIDE TABLE

TABLE TOP / Available in laminate and black mirror as a standard with custom finishes including timber veneer available upon request (see Finishes above). The table is available in multiple configurations (see following pages) and can be easily attached to any lounge via use of the simple Adapt connectors which bolt into the underside of the lounge - or with four legs for a movable table.

LEGS AND EDGE / Manufactured from tubular powder coated steel, powder coated steel bar and plastic feet for leg inserts.

UNIVERSAL/PIVOTING TABLE

TABLE TOP / Available in black powder coated MDF with other materials available upon request.

TABLE BASE / Constructed from tubular powder coated steel and powder coated sheet with a felt bottom (Universal Table).

POWER INTEGRATION

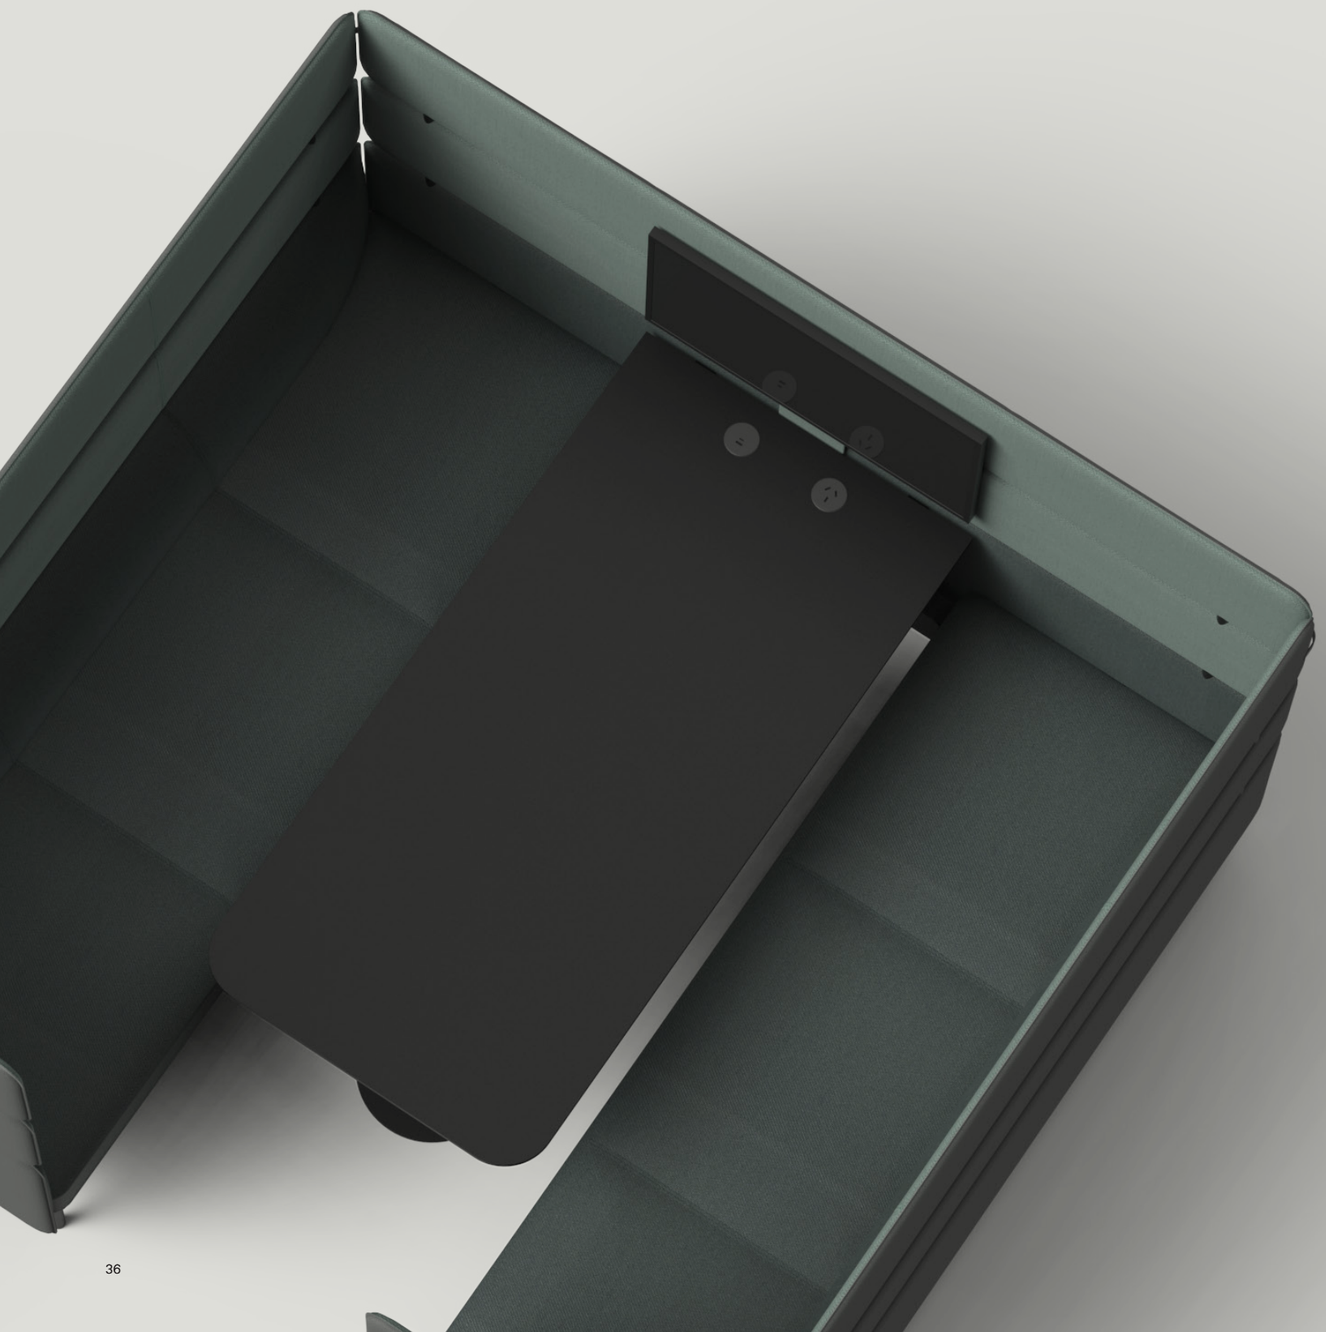
Various integrated power solutions are available within the Adapt collection. A power / USB module can be located to the underside of any of the lounge or ottoman options. This allows simple plug and play within the internal of any of the lounge settings.

A built in power / USB module can be located directly into the rear of any back. This offers an ideal location to power up while using the rear desks (see following pages).

ENVIRONMENTAL

Adapt Lounges are made in Melbourne and fully GECA certified - FFG-200026. Under GECA, products are certified against environmental performance criteria across its life cycle to ensure they deliver better environmental outcomes.

GOOD DESIGN AWARD® WINNER



Designed with the same clean lines and soft surfaces of the Adapt Lounge, the Adapt Hub creates spaces for meetings, work collaboration and private areas for focused work.

As a stand alone unit, the Adapt Hub can be placed in existing spaces without need for built partitions or screens, allowing seamless integration into interiors and to the changing requirements of the space.

A modular system with functionality at its core, Adapt Hub caters for offices, universities, airports and hospitality spaces. Conceived for both small and large open-plan spaces, the Hub is available from small 2 seater private study booths to large 6 seater presentation and collaboration spaces as well as in various heights, widths, table options and with optional accessories.
