

ROSS GARDAM

The Nebulae collection takes its name from the natural phenomena of interstellar clouds and their dynamic layered lighting effects. The geometric machined forms coupled with the fluid glass discs creates a balance between the elements.

The Nebulae Collection is a statement in any space and supplies a beautiful adjustable light level. The various configurations can be specified with a single glass disc or layered with an additional disc to create expansive light dispersion options. The collection is available as a wall light, pendant and various chandelier configurations.

The body is manufactured from machined aluminium white champagne or black anodised. Nebulae's discs come in a fluted clear, bubbled black, rippled blue or white pearl glass.
